

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SCIENCE

FRIDAY, APRIL 6, 1917

CONTENTS

<i>Radiation and Atomic Structure:</i> PROFESSOR ROBERT S. MILLIKAN	421
<i>George Christian Hoffmann:</i> DR. H. M. AMI	430
<i>Scientific Events:—</i>	
<i>Lectures on Sanitary Science at Rutgers College; Scientific Research and the Electrical World; A Census of Chemists</i>	430
<i>Scientific Notes and News</i>	332
<i>University and Educational News</i>	334
<i>Discussion and Correspondence:—</i>	
<i>Epicene Profiles in Desert Lands:</i> DR. CHARLES KEYES. <i>The Food Supply of Some Water Bugs:</i> DR. H. B. HUNGERFORD. <i>The Doctrine of Evolution and the Church:</i> DR. MARCUS BENJAMIN. <i>The Manufacture of Apparatus and Chemicals:</i> PROFESSOR LOUIS BAUMANN. <i>Lord Lister on the Value of Vivisection:</i> DR. W. W. KEEN	335
<i>Quotations:—</i>	
<i>The American Association and Work in Agriculture</i>	338
<i>Scientific Books:—</i>	
<i>Clements on Plant Succession:</i> PROFESSOR RAYMOND J. POOL	339
<i>Special Articles:—</i>	
<i>Tractive Resistances to Motor Trucks on Roads and Pavements:</i> PROFESSOR A. E. KENNELLY AND O. R. SCHURIG	341
<i>Societies and Academies:—</i>	
<i>The Biological Society of Washington:</i> DR. M. W. LYON, JR.	343

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

RADIATION AND ATOMIC STRUCTURE¹

WHILE the study of the physical and chemical properties of matter has produced our present atomic theory and furnished most of the information which is available about the way in which the myriad molecular structures are built up out of their atomic constituents, it has been chiefly the facts of radiation which have provided reliable information about the inner structure of the atom itself. Indeed, during all the years in which the dogma of the indestructible and indivisible atom was upon the stage, it was the complexity of the spectra even of simple gases which kept the physicist in the path of truth and caused him continually to insist that the atom could not be an ultimate thing, but rather that it must have a structure, and a very intricate one at that—as intricate, in Rowland's phrase, as a grand piano.

Yet the evidence of spectroscopy, though tremendously suggestive in the series relationships brought to light between the frequencies of the different lines of a given substance, was, after all, most disappointing, in that it remained wholly uninterpreted in terms of any mechanical model. No vibrating system was known which could produce frequencies related in the manner corresponding to the frequencies found even in the simplest of series, viz., the Balmer series of hydrogen. The discovery and study in the late nineties of corpuscular radiations of the alpha and beta type, with the changes in chemical properties accompanying them, merely

¹ Address of the president of the American Physical Society, New York, December, 1916.
